This document summarizes additions in REX Suite 3.8  
Additions are documented since REX Suite 3.7

=====

## 1. New Features

-----

The User Interface has been modernized with new components for the grid/forms/charts. A majority of the REX nodes now include a completely rewritten code base while preserving the workflow features.

Model execution is now available right in the node where you are making changes to the project.

Computation speed improved when running multiple cases in *Optimization mode* and while running Confidence Region Calculations in *Estimation mode*.

For membrane gas-gas reactor, Pressure can be chosen for any of the phases in the Profile Relationships node.

Images and information are updated in the help system.

## 2. Changes and Bug fixes

-----

In addition to the above, this version also includes improvements to the installation and minor bug fixes.
